Career Summary

Dedicated and hard working MERN stack specialist with over 1 year of experience in multiple front and backend technologies. I have completed a Full-Stack Certification bootcamp through the University of Central Florida for Web Design. My previous experience in retail has given me an unbreakable work ethic and leadership ability that will carry me into my next career in technology.

Technical Skills

- HTML5
- CSS
 - Bootstrap
 - Bulma
- Javascript(ES6+)
 - Jest
 - Bcrypt.js
 - JQuery
- React.js
- MySQL
 - Sequelize.js
- MongoDB
 - Mongoose.js
- Express.js
- Node.js
- Git
- IndexDb
- Handlebars.js
- Webpack
- GraphQL
 - Apollo Client

Projects

Shop-Shop

Repo (React Context Api): <https://github.com/beamchristian/shop-shop>

Repo (Redux Conversion): <https://github.com/beamchristian/shop-shop-redux>

Deployed: <https://frozen-beyond-22993.herokuapp.com>

- **Shop-Shop** is a MERN stack ecommerce application using redux to store state.
- This project demonstrates a working ecommerce Full stack MERN application. My first task was to convert the application to a Global Store using React Context Api, then create the shopping cart ui, add offline functionality with IndexedDb and finally setup checkout functionality using the Stripe Api. I then converted everything to a Redux Store.
- Tools/Languages: Javascript(ES6+), MongoDB, Express.js, React, Node.js, IndexedDb, Bcrypt.js, Redux.js

Deep-Thoughts

Repo:

Deployed:

- 1-liner - What does the app do?
- 1-2 sentences on what the project accomplishes and your responsibilities
